The Public Welfare institutions alone serve close to 40,000 meals a day and use more than 7,000 quarts of milk, 12,000 pounds of butter, 12,000 eggs. 5,300 pounds of fresh mest, 9,000 pounds of bread, 12,000 pounds of vegetables and and a ton or more of granulated sugar a day. Few people realize the number or persons necessary in a well organized hospital for the proper handling of those who are ill and therefore partly or entirely unable to take care of themselves. The following list of bospital workers and employees who are concerned to a greater or less degree in the care of one patient may illustrate the point. There are superintendents and deputies, the attending and consulting staff of physicians and consulting staff of physicians and consulting staff of powers. While helping Mr. X to accure new work of some sort, milk and other essential food were supplied and some clothing and other help extended to the children have been treated in the hospital for silght illnesses.
